MADE IN LONDON

MADE FOR YOU

HOW IT ALL STARTED

The first Brompton was designed and built in London 40 years ago by Andrew Ritchie and it is still the city that inspires us most. Every bike is still hand brazed and assembled at our factory in the capital.

CHOOSING YOUR BROMPTON

Each Brompton is built to order and handmade at our London factory. This guide will outline how your Brompton can be perfectly suited to your lifestyle.

1 – HANDLEBARS

With four handlebar types offering different ride positions, there's one suited to your needs.

2 – GEARS

1 SPEED
Light and simple for the purists.

2 SPEED
Same as the 1 speed, but with an extra gear for climbing hills and accelerating.

3 SPEED
A robust hub gear, a popular choice for everyday cycling

6 SPEED
The ultimate all-rounder with the widest range of gears.

Raised and lowered gearing is also available; see price list or talk to your dealer about the options available.

3 – MUDGUARDS

NO MUDGUARDS
Version E – Light and sporty

MUDGUARDS
Version L – For all-weather cycling

MUDGUARDS & RACK
Version R – For additional luggage space and a platform to aid mobility when folded

4 – FRAME

Brompton provides two frame options. The Superlight frame is lighter, with titanium forks and rear frame for a softer ride and easier carrying.

REGULAR ALL-STEEL
from 10.1kg/22.3lbs

SUPERLIGHT
from 9.4kg/20.7lbs

5 – COLOUR

Standard all-steel frames can be ordered in one or two colours: two coloured bikes have one colour for the main frame and the other for the extremities.

On Superlight frames, you choose one colour only for the main frame and handlebar support. The titanium front forks and rear frame come in their natural colour, grey.

● MAIN FRAME

● EXTREMITIES

MONO

BLACK

GREY

BRIGHT COLOURS

BERRY CRUSH

LAGOON BLUE

LIME GREEN

RED

CLASSIC COLOURS

IVORY

RACING GREEN

TURKISH GREEN

PREMIUM COLOURS

STARDUST BLACK

Stardust Black is a high gloss finish with a metallic flake, reflecting the light for a unique look. It is only available for the full frame or as a Superlight option.

RAW LACQUER

Raw Lacquer is a unique industrial finish, showcasing the work of our skilled frame builders. Each frameset looks slightly different from the next thanks to the natural properties of the steel; it is only available for the full frame or as a Superlight option.

TEMPEST BLUE

6 – SADDLES

BROMPTON SADDLE

Comfortable and practical: this unisex saddle has a moulded grip under the nose to make carrying easier. Available in standard and wide widths

USB SADDLE LIGHT

The compact Cateye Rapid Mini USB rechargeable rear light clips snugly to a custom Brompton saddle mount

BROOKS B17 SPECIAL

Finished with hand-hammered copper rivets, this traditional leather saddle will give you years of comfortable cycling. Available in male and female options

7 – SEAT HEIGHT

STANDARD SEATPOST

Inside leg measurement of 32" to 33"

EXTENDED SEATPOST

Better suited to those with an inside leg over 84cm/33"

TELESCOPIC SEATPOSTS

Best suited for an inside leg over 90cm/35". It can also be folded smaller than the extended version

8 – SUSPENSION

STANDARD

Only suitable for those under 70kg (154lbs)

FIRM

Necessary for those over 70kg (154lbs) and those who enjoy a firmer riding style.

10 – LIGHTING

Riding at night is a joy. Make sure you can be seen.

REFLECTORS ONLY

BATTERY LED SET

A powerful Cateye Volt 300 front USB rechargeable light and rear Brompton-designed battery light

SHIMANO HUB DYNAMO

A reliable lighting solution designed for Brompton by Shimano, with no worrying about recharging batteries

SCHMIDT SON HUB DYNAMO

Beautifully engineered, highly efficient, and will give years of reliable service. It comes with a powerful Busch & Müller LED lamp to see and be seen in all conditions

9 – TYRES

BROMPTON STANDARD

Ideal for city riding, with low rolling resistance and good puncture protection

SCHWALBE KOJAK

The fastest, lightest and most efficient option, for those with a need for speed

SCHWALBE MARATHON

A robust all-rounder and a reliable option for all riding conditions with added Kevlar puncture protection

11 – FRONT LUGGAGE SYSTEM

The unique front luggage system means you can carry your Brompton bag on the front of your bike. Whether shopping, socialising, sightseeing, working, travel or adventure, the addition of luggage suddenly increases the versatility of your Brompton however you ride. Bags can carry loads of up to 10kg (22lbs), and attach to the main frame so that steering is smooth and stable.

FRONT CARRIER BLOCK ONLY

Fitting this as part of your bike build gives you freedom to choose your luggage at a later date.

11 – FRONT LUGGAGE SYSTEM

T-BAG

The ultimate touring bag. Fill this bag up and go on an adventure.
